Professional Summary

Data Analyst with a background in Computer Science and hands-on experience in business intelligence, SQL query optimization, and Python-driven data automation. Proven track record of supporting Growth, Finance, and Operations teams by building automated dashboards, analyzing user behavior, and designing clean data pipelines to convert raw metrics into actionable growth strategy.

Experience

Junior Data Analyst | Truck Lagbe Ltd | Dhaka, Bangladesh Feb 2026 - Present

- Streamlined recurring KPI reporting through Metabase dashboards, reducing manual reporting time by 40% and improving visibility into growth, campaign performance, customer engagement, and marketplace activity.
- Developed foundational KPI logic for GMV and customer acquisition, enabling leadership to track marketplace health and credit performance.
- Strengthened data reliability by reconciling analytical outputs against source-of-truth tables and validated metric definitions before stakeholder reporting.
- Investigated data-quality anomalies using SQL (REGEXP, LIKE) to identify inconsistencies and improve reporting accuracy.
- Translated business requirements into analytical queries and reporting logic, collaborating with cross-functional stakeholders to clarify definitions, validate KPIs, and support data-driven decision-making.

Projects

Retail Sales Analytics Dashboard GitHub

Python, PostgreSQL, Power BI, Excel

- Analyzed 100K+ retail records to create a Sales Performance Dashboard that identified a top-performing branch and highlighted underperforming product categories for targeted strategy.
- Applied advanced SQL techniques, including CTEs, window functions, and complex joins, to identify top-performing branches, products, and product categories.
- Cleaned and validated analytical datasets using Python and Pandas, implementing data-quality checks to support reliable reporting.

Healthcare Revenue Cycle Analytics GitHub

Python, PostgreSQL, Metabase

- Built a healthcare analytics solution using synthetic EHR and billing data to analyze revenue cycle KPIs, claim denial rates, provider productivity, and payer performance.
- Used PostgreSQL and Python to prepare analytical datasets and Metabase to develop KPI reporting for revenue-cycle analysis.

Technical Skills

SQL & Databases: MySQL, PostgreSQL, CTEs, Window Functions, Complex Joins, Subqueries, Aggregations

Business Intelligence: Power BI, Metabase, Tableau, KPI Reporting, Dashboard Development, Advanced Excel, VLOOKUP, Pivot Tables, Power Query, Data Validation

Python & Data: Python, Pandas, NumPy, Data Cleaning, ETL/ELT Pipelines

Analytics: Unit Economics (Revenue, Cost Ratios, Conversion, Cohorts), Anomaly Detection, Data Quality

Tools: Docker, Grafana, Git, Google Apps Script

Education

M.Sc. in Computer Science and Engineering 2025 – Present
East West University, Dhaka CGPA: 3.41/4.00

B.Sc. in Computer Science and Engineering 2020 – 2025
East West University, Dhaka CGPA: 3.12/4.00

Certifications & Achievements

HackerRank SQL (Intermediate) Certification View Certificate

- Solved 200+ SQL challenges on LeetCode and HackerRank — query optimization, window functions, complex joins.
- LeetCode | HackerRank
